

Definitely NOT!!!!

The LAST thing we need is more government-enabled snooping.

NO, NO, NO. Do NOT do anything that makes it easier for our privacy to be invaded on the Internet. Do NOT require "backdoor" access by Voice over IP and Internet Access providers. This adds little to real law enforcement and security, but opens a gaping hole for possible abuse.

Please remember that your responsibilities should be primarily to the citizens of this country NOT John Ashcroft and other Big Brother zealots!

Please!

Steve Beisner
